## PROFESSIONAL EXPERIENCE

### BrokerBay — QA Automation Engineer

Toronto, ON | May 2022 – Present

Built and maintained Cypress (JavaScript) UI automation covering critical end-to-end user flows across browsers. Integrated automated test runs into CI/CD and Cypress Cloud, enabling parallel execution, reporting, and debugging. Developed REST and GraphQL API automation using Cypress (cy.request) and Postman; validated payloads and status codes. Improved regression coverage and release confidence by creating test plans, scenarios, and suites in Testmo and Confluence. Supported sprint releases with Smoke/Sanity/Regression testing in staging and post-release validation in production. Collaborated with developers in an Agile/Scrum environment and contributed to code reviews via GitHub.

### Linn Bank (Contract) — QA Automation Engineer

New York, NY | Feb 2020 – May 2022

Developed UI regression automation using Selenium WebDriver (Java) with Cucumber BDD and Page Object Model (POM). Automated REST API validation using Rest Assured and performed manual API testing with Postman. Integrated automated test execution into Jenkins CI/CD pipelines to support continuous delivery. Produced Cucumber HTML reports with step-level logs and screenshots to speed up failure triage. Performed backend data validation using SQL and Oracle SQL Developer to ensure data integrity. Managed test plans, test cases, and defects using Jira and Confluence in Agile sprints.

### Resort Line (Contract) — Quality Assurance Automation Engineer

New York, NY | Apr 2018 – Feb 2020

Designed and implemented a TestNG automation framework using Java + Selenium WebDriver for web applications. Built an end-to-end regression suite covering UI and backend validation for booking and finance workflows. Implemented Page Object Model and Page Factory patterns to improve maintainability and scalability. Developed data-driven automation using Apache POI to read/write test data from Excel files. Performed backend validation using SQL and JDBC against Oracle databases. Reported and tracked defects in Jira and participated in SDLC/STLC activities within Agile teams.

### GMI Bank (Contract) — QA Manual Tester

New York, NY | Feb 2017 – Mar 2018

Created and executed test cases and test scenarios based on business requirements and acceptance criteria. Performed functional, regression, and exploratory testing for web application features. Maintained a Requirements Traceability Matrix (RTM) to ensure full requirements coverage. Conducted manual API testing using Postman and Swagger to validate request/response behavior. Performed backend validation using SQL queries to verify data accuracy and integrity. Reported defects in Jira and documented test results in Confluence; collaborated in Agile/Scrum ceremonies.
